

URGENT PET CARE

EXCELLENT, COMPASSIONATE, EMERGENCY PET CARE

WHEN TO REFER PATIENTS

Urgent Pet Care specializes in managing urgent medical and surgical cases. We're here to provide continuity of care for your patients, especially when your schedule, equipment, or staffing cannot accommodate same-day needs.

APPROPRIATE REFERRALS ARE PATIENTS WHO

- Present with acute illness requiring in-house diagnostics or urgent stabilization
- Need sedation, pain control, or wound management that exceeds general practice capabilities
- Require 24/7 monitoring or hospitalization with IV fluids, medications, or ongoing nursing care
- Have critical conditions that require stabilization before specialist referral
- Need after-hours care or weekend management

COMMON MEDICAL CASES WE MANAGE

- Persistent vomiting, diarrhea, or GI upset
- Suspected pancreatitis or endocrine emergencies (Addisonian crisis, diabetic ketoacidosis, etc.)
- Hematuria, urinary obstruction, or stranguria
- Acute respiratory distress or frequent coughing
- Lethargy, collapse, hypothermia, or pale mucous membranes
- Seizures or neurological abnormalities
- Suspected toxin ingestion (chocolate, xylitol, grapes, rodenticides, etc.)

SURGICAL & PROCEDURAL CASES WE MANAGE

INCLUDES STABILIZATION, DIAGNOSTICS, SURGICAL INTERVENTION, OR POST-OP CARE

- HBC and Polytrauma
- Lacerations, abscesses, bite wounds
- Foreign body ingestion
- GDV
- Dehiscence or post-surgical complications
- Fractures
- Pyometra or dystocia
- Hemoabdomen/Splenic mass removal

ADDITIONAL PRESENTATIONS

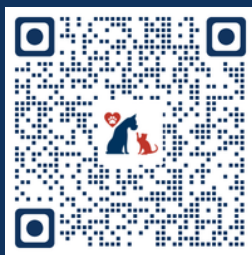

- Otitis externa/media, ocular disease/emergencies, or allergic reactions
- Abscesses
- Post-op rechecks with concerning clinical signs
- Parvovirus Enteritis
- Lameness

***We are proud to be an extension of your practice
when your patients need specialized, after-hours,
weekend, or holiday care.***

WHAT SETS US APART

- Clients are always returned to their referring DVM for follow up and non-urgent visits
- Access to critical care consultation for complex medical cases
- Full in-house diagnostics, including digital radiography, comprehensive abdominal ultrasound, CBC/chemistry, coagulation panels, Ionized Calcium, ACTH stim testing, Ammonia
- 24/7 monitoring and hospitalization for patients requiring continuous care
- Specialized treatments, including high flow oxygen support, blood products (Canine pRBC and plasma), parvo hospitalization and monoclonal antibody access, and endoscopy for foreign body removal
- Skilled nursing and medical support staff trained in urgent/emergent care protocols
- Open every day of the week, including evenings, weekends, and holidays
- Prompt communication and thorough discharge documentation
